SUMMARY

Computer Science Engineering Student specializing in AI with a focus on building full-stack applications and Big Data infrastructure. Recently developed an AI-native Voice-to-SQL Agent using local LLMs (Ollama) and React. Proficient in distributed processing with Hadoop and Spark, with a strong commitment to writing clean, scalable code.

EDUCATION

Bachelor of Technology, Computer Science & Engineering-AI

Sri Venkatesa Perumal College of Engineering and Technology •Puttur, Tirupati•2027.93.7%

Class XII, Science stream

Kendriya Vidyalaya •Nellore•2023•80%

Class X (AISSE)

GVK Chinmaya Vidyalaya •Nellore•2020•96%

SKILLS

- Programming Languages:** Python, Java, C
- Web Development:** HTML, CSS, JavaScript
- Big Data Technologies:** Apache Spark (PySpark), Apache Hadoop (HDFS, MapReduce)
- Development Tools:** Git, Linux, Jupyter Notebook
- Development Practices:** Focus on writing clean, readable and structured code.
- AI & ML:** Local LLMs (Ollama), NLP, Prompt Engineering
- Concepts:** Computer Vision basics, NLP, EDA, ML concepts.

PROJECTS

Big Data Environment Setup (Academic Lab) [Github link]

Note: Deployment conducted on a secured academic intranet; full architectural logs and configurations are documented in the linked repository.

- Configured a pseudo-distributed Hadoop cluster on a Linux environment to simulate distributed storage and processing.
- Implemented HDFS and YARN architecture, ensuring proper node communication and resource allocation.
- Executed MapReduce jobs to validate cluster stability and performance.

Voice-to-SQL AI Agent | React, Python, Ollama, SQL [Github link]

Note: Local deployment using Ollama; see GitHub for video demonstration.

- Developed a Full-Stack AI Agent that converts natural language voice commands into SQL queries using Ollama (Qwen2.5-Coder) for local inference.
- Integrated Web Speech API for real-time Speech-to-Text and a personalized "Voice Greeting" system for enhanced UX.
- Built a Flask API with SQLAlchemy to securely bridge LLM outputs with a SQLite database.
- Designed a React.js dashboard to visualize dynamic query results and mascot-based interaction feedback.

ACHEIVEMENTS AND CERTIFICATIONS

Certification Name: Deep Learning for Computer Vision

- Issuing Organization: NPTEL (Funded by MoE, Govt. of India) | IIT Hyderabad
- Issue Date: Oct 2025
- Credential ID: NPTEL25CS93S370700672
- Skills: Computer Vision, Convolutional Neural Networks (CNNs), Object Detection (YOLO/SSD), Image Segmentation, OpenCV, PyTorch, Transfer Learning, and Data Augmentation.

Certificate of Completion: Machine Learning – Elewayte (2025)

- Credential ID:** CC320253784
- Verified expertise in Machine Learning principles, including supervised and unsupervised learning techniques.

Certification Name: Quantum Computing: Algorithms and Limitations Through the Query Model

- Issuing Organization: NPTEL (Funded by MoE, Govt. of India) | IIT Kanpur
- Issue Date: Apr 2025
- Credential ID: NPTEL25CS93S370700672

Certification Name:ServiceNow Virtual Internship Certification

Issued by SmartBridge, AICTE, and ServiceNow (May 2026)

Cert ID: SNU2021027

KEY STRENGTHS

Analytical & Logical Problem-Solving: Possesses strong analytical reasoning for debugging complex code and solving abstract problems, demonstrated in both technical settings and logical challenges.

Agile & Collaborative: Gained practical experience working effectively in a team-based, Agile environment during my internship.

Peer Mentorship: Skilled at helping others succeed by assisting fellow students in lab hours, guiding code comprehension, debugging, and logical reasoning.

Adaptable & Resourceful Learner: A continuous learner who embraces new challenges and finds creative, practical solutions with the tools available.
